PROFESSIONAL SUMMARY

Electrical design engineer with 4 years of experience and 20+ delivered projects across hospitals, residential high-rises, mission-critical data centers, and outdoor utility networks. Managed up to 4 concurrent projects and stepped into Chief Project Engineer responsibilities during organizational restructuring at a 200+ engineer design institute. LV and MV power distribution up to 25 kV, load/short-circuit calculations, lighting design, grounding, lightning protection. Daily Revit MEP and AutoCAD with full BIM coordination. M.S. in Power Supply Systems; WES and CES verified.

CORE COMPETENCIES

- **Power Distribution:** LV and MV systems up to 25 kV; switchgear, transformers, distribution boards, panel schedules; load, voltage drop, short-circuit and fault current analysis
- **Design Scope:** Power supply, interior/exterior lighting, grounding and lightning protection, outdoor cable networks, emergency power, standby generation, fire-protection power coordination
- **BIM / CAD / Software:** Revit MEP, AutoCAD (full design-to-documentation, clash detection, multi-discipline coordination), DIALux evo, ETAP, Python
- **Codes / Project Types:** CEC, NFPA 70, NFPA 101, IEEE, CSA, IEC. Hospitals & healthcare, mission-critical data centers, residential high-rises, outdoor utility networks, commercial and mixed-use
- **Equipment & Coordination:** Switchgear/MCCs, transformers, UPS, generators & ATS, luminaires (ABB, Schneider); coordination with architectural, structural, mechanical/HVAC, fire alarm, IT/telecom, security
- **Languages:** English (C1, professional fluency), Russian (native), French (B1)

PROFESSIONAL EXPERIENCE

Electrical Design Engineer | Arch-Consult LLC (ITCAD) Apr 2025 – Present

- Deliver LV power supply design for commercial and mixed-use projects in Revit MEP: load calculations, panel schedules, single-line diagrams, cable routing, permit-ready and construction drawing packages aligned with CEC.
- Photometric lighting design in DIALux evo; luminaire selection for architectural and energy targets.
- BIM coordination across architectural, structural, and MEP teams; design reviews, RFI responses, QA/QC before issue for construction.

Electrical Design Engineer | Tesli JSC Jun 2024 – Feb 2025

- Owned full electrical packages for multi-story residential and commercial buildings: power supply, interior/emergency lighting, outdoor cable networks, underground routing and cable trays in AutoCAD and Revit MEP; produced single-line diagrams, grounding designs, equipment specs and BOMs for switchgear and distribution boards.
- Led Revit MEP adoption in an 8-person team previously working only in AutoCAD; built BIM templates and standards from scratch; documentation throughput improved roughly 20%.

Electrical Engineer | Stroyengineering / Standart Jan 2024 – Jun 2024

- Designed power supply, lighting, and outdoor electrical networks for mixed-use and residential projects from schematic through construction documentation; photometric calculations in DIALux evo and luminaire selection.
- Produced full construction packages: single-line diagrams, cable routing, grounding layouts, equipment schedules.

Independent Technical Consultant | Self-employed Dec 2022 – Dec 2023

- Freelance electrical design support to private clients while pursuing an independent early-stage technical project. Returned to full-time engineering practice in late 2023 when external economic conditions made the venture unviable.

Electrical Engineer | Perspectiva LLC (200+ engineer design institute) Sep 2021 – Dec 2022

- Delivered LV and MV power supply design up to 25 kV for hospitals, high-rises, and commercial buildings; managed up to 4 concurrent projects in an 8-person electrical department; performed load flow, voltage drop, short-circuit, grounding, and lightning protection calculations; designed cable routing (trenches, trays, duct banks); coordinated emergency and fire-protection power; worked with vendors including ABB and Schneider Electric.
- Acting Chief Project Engineer for 4 months after both the CPE and Group Lead left the firm; kept active projects on track and coordinated a team of 3 engineers in parallel with the design workload.

EDUCATION AND PROFESSIONAL REGISTRATION

M.S., Electrical Engineering — Power Supply Systems, RUT MIIT (Russian University of Transport), 2019. **Credentials:** WES and CES (University of Toronto), both ECA verified. **P.Eng pathway:** Eligible for EIT registration (PEO / APEGA / EGBC); pursuing P.Eng licensure.
